

ISO 11359-2:1999, Plastics -- Thermomechanical analysis (TMA) -- Part 2: Determination of coefficient of linear thermal expansion and glass transition temperature

This part of ISO 11359 specifies a test method, using thermodilatometry, for the determination of the coefficient of linear thermal expansion of plastics in a solid state by thermomechanical analysis (TMA). This part of ISO 11359 also specifies the determination of the glass transition temperature using TMA. This title may contain less than 24 pages of technical content.
