

# MCS D Analyzing Requirements and Defining .NET Solution Architectures Exam Cram 2 (Exam 70-300)

MCS D Analyzing Requirements and Defining .NET Solution Architectures Exam Cram 2 (Exam 70-300) helps you pass the 70-300 exam, which is a core exam in the MCS D .NET track and measures the ability to analyze requirements and define Microsoft .NET solution architectures. This exam is extremely tricky, widely considered the most difficult of any MCS D exams because of its emphasis on case studies as well as its demand that candidates have at least two years of hands-on experience. This book is not intended to teach new material. Instead, it assumes that you have a solid foundation of knowledge but could use a refresher on important concepts, as well as a guide to exam topics and objectives. The book features test-taking strategies, time-saving study tips, and a special Cram Sheet that includes tips, acronyms, and memory joggers not available anywhere else! The Cram Sheet is especially useful for last-minute review before the test begins. The CD features PrepLogic? Practice Tests, Preview Edition. This product includes one complete PrepLogic Practice Test with approximately the same number of questions found on the actual vendor exam. Each question contains full, detailed explanations of the correct and incorrect answers. The engine offers two study modes, Practice Test and Flash Review, full exam customization, and a detailed score report. The best-selling Exam Cram 2 series is supported online at examcram.com, offering industry news, study tips, practice questions, and discussion forums. Each book is published under the direction of Series Editor Ed Tittel, the leading authority on IT certification. This book has been subjected to rigorous technical review by a team of industry experts, ensuring content is superior in both coverage and technical accuracy, and has earned the distinction of Cramsession? Approved Study Material.
