

# ASP.NET: Your visual blueprint for creating Web Applications on the .NET framework (Visual (Software))

ASP.NET: Your visual blueprint for creating Web applications on the .NET Framework shows you everything you need to create dynamic Web applications. Each step is displayed with callouts so you can see exactly where the action takes place on the screen. Arm yourself with detailed coverage of over 100 tasks and other ASP.NET functions, including easy and advanced web forms, accessing data, application management, and migrating from other languages. Also included is a special appendix on .NET language reference that explains Visual Basic.NET, C#, and Jscript.NET and an e-version of the book with tons of usable code, the latest SOAP toolkit and reference library for .NET platform.
